

API Endpoint Documentation

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
Auth					
POST	/api/auth/register	Registers a new user as either an Organiser or a Participant.	None (Public)	{ "email": "user@example.com", "password": "P@ssw0rd", "firstName": "John", "lastName": "Doe", "role": "Participant" }	201 Created - User creation successful with user details (excluding password). 400 Bad Request - Validation errors. 409 Conflict - Email already exists.
POST	/api/auth/login	Authenticates a user and returns a JWT access token.	None (Public)	{ "email": "user@example.com", "password": "P@ssw0rd" }	200 OK - Login successful, returns JWT token and user role. 401 Unauthorized - Invalid credentials. 400 Bad Request - Missing/invalid fields.
User Profile					
GET	/api/users/me	Retrieves the profile of the currently authenticated user. Combines base User details with Role-specific profile data.	Any (Logged-in)	None	200 OK - Returns user details including role and profile data (e.g., OrganisationName for Organiser). 401 Unauthorized - No token or invalid token.
PUT	/api/users/me	Updates the profile of the currently authenticated user.	Any (Logged-in)	{ "firstName": "Jane", "lastName": "Doe", "phoneNumber": "0821234567", ...role-specific fields... }	200 OK - Updated user and profile object. 400 Bad Request - Validation errors. 404 Not Found - User not found (though this shouldn't happen for a valid token).
Events					
GET	/api/events	Retrieves a list of all events. Can include optional query parameters for filtering, sorting, and pagination (e.g., ?type=Running&dateFrom=2026-09-01).	None (Public)	None	200 OK - Returns a list of events with basic details.
GET	/api/events/{eventId}	Retrieves detailed information for a single event, including its categories and weather info.	None (Public)	None	200 OK - Detailed event object. 404 Not Found - Event ID does not exist.
POST	/api/events	Creates a new event. The authenticated user must be an Organiser.	Organiser	{ "name": "Cape Town Cycle Tour", "description": "...", "date": "2026-09-15T08:00:00", "location": "Cape Town", "eventType": "Cycling", "maxParticipants": 35000 }	201 Created - The newly created event object. 400 Bad Request - Validation errors. 403 Forbidden - User is not an Organiser.
PUT	/api/events/{eventId}	Updates an existing event. Only the Organiser who created the event can update it.	Organiser	{ "name": "Updated Event Name", "description": "...", ... }	200 OK - The updated event object. 400 Bad Request - Validation errors. 403 Forbidden - User is not the owner of the event. 404 Not Found - Event ID not found.
DELETE	/api/events/{eventId}	Deletes an event and all its associated data (categories, enrolments, weather info).	Organiser	None	204 No Content - Deletion successful. 403 Forbidden - User is not the owner of the event. 404 Not Found - Event ID not found.
Categories					
GET	/api/events/{eventId}/categories	Retrieves all categories belonging to a specific event.	None (Public)	None	200 OK - Returns a list of category objects. 404 Not Found - Event ID not found.
POST	/api/events/{eventId}/categories	Creates a new category for a specific event. Only the owner Organiser can do this.	Organiser	{ "name": "Half-Marathon", "description": "21.1km", "entryFee": 250.00 }	201 Created - The newly created category object. 400 Bad Request - Validation errors. 403 Forbidden - User is not the owner. 404 Not Found - Event not found.
PUT	/api/categories/{categoryId}	Updates a specific category. Only the Organiser of the parent event can do this.	Organiser	{ "name": "Full Marathon", "entryFee": 350.00 }	200 OK - Updated category object. 403 Forbidden - User is not the owner. 404 Not Found - Category not found.
DELETE	/api/categories/{categoryId}	Deletes a specific category. Only the Organiser of the parent event can do this.	Organiser	None	204 No Content - Deletion successful. 403 Forbidden - User is not the owner. 404 Not Found - Category not found.
Enrolments					

HTTP Method	Route	Description	Role Required	Request Body	Expected Response
GET	/api/enrolments/me	Retrieves all enrolments for the currently authenticated participant.	Participant	None	200 OK - Returns a list of enrolments (including event and category details). 401 Unauthorized - User is not a Participant.
POST	/api/enrolments	Creates a new enrolment for the authenticated Participant in a specific category.	Participant	{ "categoryId": 10 }	201 Created - Returns the created enrolment object. 400 Bad Request - Validation errors or already enrolled. 404 Not Found - Category not found.
PUT	/api/enrolments/{enrolmentId}	Updates the status of an enrolment (e.g., cancel it).	Participant	{ "status": "Cancelled" }	200 OK - Updated enrolment. 403 Forbidden - User does not own the enrolment. 404 Not Found - Enrolment not found.
Results & Admin					
PUT	/api/enrolments/{enrolmentId}/result	Allows an Organiser to capture or update a participant's result (time and/or position) for an event they manage.	Organiser	{ "resultTime": "03:45:22", "position": 15 }	200 OK - Updated enrolment object with result. 403 Forbidden - User is not the organiser of the event. 404 Not Found - Enrolment not found.
GET	/api/events/{eventId}/results	Retrieves all enrolments (with results) for a specific event. Used to view the results table.	Any (Logged-in)	None	200 OK - List of enrolments for the event, likely filtered to those with results. 404 Not Found - Event not found.
